RE: Site Inspection, Doug Dykes, Lucky Double D Mine, S/009/002, Daggett County, Utah

Inspection Date: October 3, 1991  
Inspection Time: ~ 1600 - 1640  
Conditions: Fair, warm, windy  
Participants: Tony Gallegos, DOGM

Division records currently list this mine as suspended and the permit as approved. The BLM is the owner of the surface and mineral rights. In April 1991, the BLM revoked the approval of the mining Plan of Operations for this mine due to failure to submit evidence of annual assessment work. A site inspection performed by the BLM on March 21, 1991 revealed no operations had been conducted. The claim was declared abandoned and void under a Utah State Office decision dated February 20, 1991.

The purpose of this inspection was to examine the site and verify the inactive status. The general area described in the Notice of Intent was examined and photographed. No sign of an active mining operation were present. Pending verification by the BLM, this mine may be changed to inactive status (no mining was ever performed) and the file retired.
